(see driving directions on back)

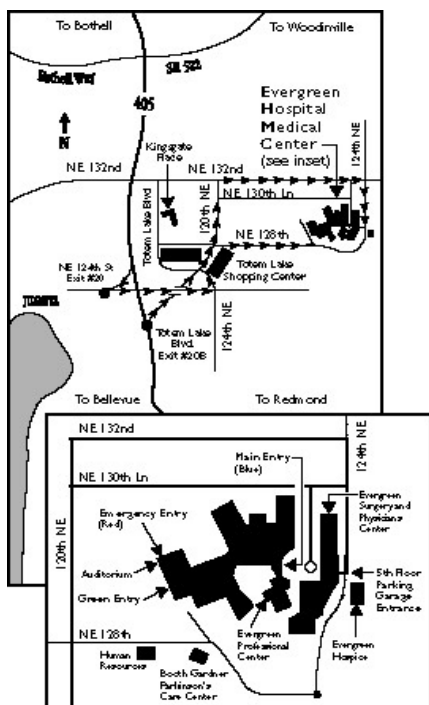

***Talk-In 146.42 s***

# MEDICAL SERVICES Communications Team TRAINING PROGRAM

Michael Loehr will provide a briefing on the expected and unexpected Public Health Emergencies that we might be expected to respond to.

Examples include: the current Measles outbreak; a potential SARS outbreak; the expected West Nile Virus contagion; and of course, any potential bioterrorism events that might occur.

Public Health emergencies are varied, random, and usually unanticipated. What do YOU need to know about them, and how do we respond as emergency communicators?

**The meeting location: Evergreen Hospital**, 12040 NE 128th St, Kirkland. Meeting is in: **Green Zone**—Images Conference Center Rooms 204.1/204.2 (near the Cafeteria)

**Driving Instructions: Southbound on I-405**  
Take the NE 124th Street exit; turn right onto 124th, then right onto 116th Avenue, right on NE 132nd, right onto 120th Avenue NE and left onto NE 130th Lane. **Northbound on I-405**  
Take the NE 124th Street/Totem Lake Boulevard exit; take the Totem Lake Boulevard exit, and proceed straight at the light to NE 130th Lane.

Park near the Green entry, or in the Parking Garage.

**Talk-in frequency is 146.42 simplex.**
